Understanding Your Bill

- **Customer Charge** - A monthly basic service charge that includes costs for meter reading, customer billing, service equipment, and other expenses. These expenses are incurred even in months when customers do not use electricity.
- **Demand** - A measure of customer or system load requirements over a measured period of time. The actual demand is the highest average kilowatt usage measured amount of all 15-minute intervals during a billing period. The billing demand is the product of the actual demand and the power factor multiplier which identifies the total power provided to the customer.
- **Distribution Charges** - Basic service charges for delivering electricity over a distribution system to the home or business from the transmission system.
- **Distribution System Improvement Charge (DSIC)** - A charge for company investment to improve service quality and increase safety by repairing, improving, or replacing eligible infrastructure used to deliver electricity.
- **DLC Charges** - Services necessary for the physical delivery of electricity service, such as supply, including default service, transmissions and distribution.
- **Kilowatt (kW)** - A measure of electrical power that is equal to 1,000 watts.
- **Kilowatt-Hour (kWh)** - The basic unit of electric energy for which most customers are charged. It equals the amount of electricity used by 10, 100-watt light bulbs left on for one hour.
- **Meter Multiplier** - The number used to calculate your total electrical usage in kWh (may vary depending on your meter type).
- **Meter Reading** - An actual (Act) reading is a reading taken from the meter. An estimated (Est) reading is used when no actual reading is available and is based on past electric usage.
- **Non-Basic Service Charges** - Any category of service not related to basic service.
- **Smart Meter Charge** - Charges for advanced metering technology and related infrastructure that will provide the ability for features such as two-way communication and interval usage data.
- **Supply Charges** - Basic service charges for generation supply to retail customers.
- **Transmission Charges** - Basic service charges for the cost of transporting electricity over high voltage wires from the generator to the distribution system.
